Nights of Painful Watching
with Pox, Sickness, Crying Children, can be avoided by the use of Mrs. Winslow's Soothing Syrup. It relieves the little sufferer from pain, cures wind colic, regulates the stomach and bowels, corrects acidity, and during the process of teething it is invaluable.

many paper dollars. Ver-
Argentine Republic moves.

the preceding data will prove to
our agriculturists how important it
is that they should form the cul-
tivation of this cereal, by increasing
the yield and improving its quality
in order that they may compete to
advantage with their rival in the
European and American markets;
otherwise we shall run the risk of
losing one of the principal sources
of our agricultural wealth. The use
of the excellent fertilizers we now
possess will conduce to this end by
increasing a hundred-fold the pro-
ducing power of our fertile soil.

The trade in copper has not de-
clined as may be seen by the figures
given above. The average price of
bar copper in our market rose in
1870 to 38 dollars per metric quintal,
but in 1875 it did not rise beyond 32
dollars, which shows that there has
been an increase in the price of bar
copper, although there was a dimi-
nution in the quantity exported.

The production of copper in Great
Britain, which country absorbs
nearly all ours, diminishes year by
year. 'Five years ago,' says the
Statist, 'one hundred mines yielded
71,000 tons of ore and 4,333 tons of
fine copper. Last year sixty-five
mines yielded 51,000 tons of ore and
3,462 tons of fine copper. Figures
show us that of the total importation
of regulus 195,000 tons correspond
to Spain and only 15,717 to Chile.'

There was a considerable fluctua-
tion in the London market in 1870
During the first quarter there was a
continual tendency to decline. At
the beginning of the year bars were
quoted £57 15s., and at the end
quotations fell to £55 5s. At the
beginning of April the alarm caused
in that market by the news of the
rupture between Chile and the allied
republics caused a rise in bar cop-
per of £1 per ton, until advices of a
considerable number of charters
made beforehand for the conveyance
to Europe of the stocks of the late
Agustin Edwards, about 6,000 tons,
caused a decline in price. Bars
went down again, fluctuating be-
tween £52 5s. and £55 5s. About
the middle of September news was
received of the final shipment of
that lot and a decline in transac-
tions took place, immediately fol-
lowed by a progressive and steady
demand. In the first week in Oc-
tober there was much demand and
prices rose. Bar copper rose £2
to £8 a ton, and in that month the
price stood at £66 10s., at which
figure it remained, with slight alter-
ations, until March this year. In
the last quinquennium, 1873-1879,
the quotations of copper in the En-
glish market were as follows:—

Bars:

1875 1876 1877 1878 1879
£51 76 66 58 66

Regulus and ores:—
16 to 17 15 to 16 12 6 to 13 11 to

11 6 13 6 to 14 3.

wheat crop of Great Britain
reached six million quarters,
at 17,416,800 hectolitres, and
country requires for its an-
nual consumption 69,787,200 hecto-

litres, it had a deficit for 1879 of
52,740,400 hectolitres. Towards
making good this deficit the United
States sent 20,221,665 hectolitres of
wheat, and 234,758,032 kilos of
flour.

To provide for this enormous ex-
portation (without taking into ac-
count the very considerable quantity
sent to British possessions in Asia
and America) that prosperous nation
counted on the unprecedented crop
of 1878: 150,152,778 hectolitres.

During the last fifteen years, 1865
to 1879, the greatest importation of
wheat and flour by Great Britain
was in 1877, when the value rose to
£40,694,410, equal in 1879, when it
reached £39,970,120.

The agricultural crisis continues
with equal intensity in Grt. Britain.
In 1879, the deficiency in the wheat
crop was little inferior to that of
1878. This alarming phenomenon is
not confined exclusively to that na-
tion, but it affects in quite as serious
a manner other agricultural countries
in Europe.

To provide for the requirements
of their consumption European coun-
tries rely principally on the stocks
of the United States crop of 1879,
which exceeded that of the previous
year by 7 per cent, and the acreage
under wheat by 1 per cent.

Our principal consumer's (Great
Britain) yield of wheat for this year
is estimated at 31,695,020 hectolitres,
and as the average quantity that
country requires for its annual con-
sumption amounts to 69,787,200 hec-
tolitres, she will have a deficit of
38,092,180 hectolitres only.

The demand from France and other
countries which require to make good
their deficit by supplies from abroad
will be inferior to that of 1879. It
is calculated that Europe will re-
quire for its necessities 26,170,204
hectolitres less in 1881 than in 1880.

As the quantity of this cereal offer-
ed in the markets of supply, espe-
cially in the United States, is very
much in excess of the demand from
abroad, a considerable reduction in
the price is expected.

'If the average price of wheat,'
says the Statist of London, 'was be-
low 38 shillings under the excep-
tional conditions of the crop of 1878,
with an excess of more than three-
fifths in the crop of the United
States, what will the price be if
this circumstance be taken into
consideration? That reliable or-
gan of the English press is of op-
inion, therefore, that the price of
wheat will fall to 30 shillings, and
that before long that primary article
of subsistence will be obtainable at
a very cheap rate.

The preceding data will prove to
our agriculturists how important it
is that they should form the cul-
tivation of this cereal, by increasing
the yield and improving its quality
in order that they may compete to
advantage with their rival in the
European and American markets;
otherwise we shall run the risk of
losing one of the principal sources
of our agricultural wealth. The use
of the excellent fertilizers we now
possess will conduce to this end by
increasing a hundred-fold the pro-
ducing power of our fertile soil.

The trade in copper has not de-
clined as may be seen by the figures

EDITOR'S TABLE.

The Royal Mail steamer Elbe sails
this afternoon. Our office is open
from 9 to 11 a.m., for the sale of pa-
pers. The mail-bags close at noon
sharp.

The Nacional telegram gives the
latest dates from Europe to 23rd
ult. The French had 50,000 men on
the Algerian frontier. Fresh earth-
quakes in Chios, and the island to-
tally abandoned. Samaroff and the
girl Petrowski hanged at St. Peters-
burg terrible scene at the execution.
Nihilists say they will kill the new
Ozar. Lord Beaconsfield died on
19th. Profound impression in En-
gland. Parnell still preaching the
Land League in England.

Everybody shook hands yesterday
over the good news from Paris. The
Cey of Tunis has come wisely in
braying 'mea culpa,' or he might have
lost his throne. There is no cloud
now on the political horizon of
Europe, but 'quien sabe' when another
may appear. Dame Europa is
never very long without a row of
some kind in her school.

Banking and finance talk is now
the order of the day, owing to the
two projects laid before Congress.
Dr. Marcos Avellaneda's Bill is con-
sidered the best, but many agree
with the Pampa that more private
banks are what is wanting rather
than a big State concern, and with
the much abused privileges too, at
least for five years. The President
very properly denounced fiscal pri-
vileges in his Message, and this
clause, at least, should be rejected.

The advices from Montevideo re-
port several conferences there be-
tween the Minister for Foreign
Affairs and the Foreign Ministers
and a deal of 'wiring' going on
between Montevideo and Rio. What's
in the wind now?

The Club Argentino was within
an ace of making acquaintance with
'the morning' on high on Friday
morning, owing to an escape of gas.
Some of the members had left the
gas turned on in the reading room
on the previous night, and the strong
smell led to a search for the point
of escape. When one of the ser-
vants entered the reading room with
a lighted match, there was a terrific
explosion that shook the whole
house, and the room was filled with
flames, which were extinguished by
turning off the meter. The paper
and decorations of the room were
ruined, but nobody suffered any
personal injury.

The milkmen of Rosario have
struck because the Municipality ob-
jected to their selling watered milk,
and the inconvenience to families is
tremendous. The Capital says that
watered milk is capital stuff, and
that the Corporation has no right
to interfere with its sale! This milk
and water theory won't hold
water, colleague.

Judge Villada, of the Corrioba
Bench, died some days ago, aged 80.

Dr. Alberdi got a magnificent re-
ception in Rosario from the most
of the Athenaeum Club, mostly
young students, one of whom made
an excellent speech, and the writer
was deeply affected when replying
to it.

They have a rumour in Rosario
that another English Bank with a
capital of £2,000,000 is about to be
started in Buenos Ayres. The more
the merrier. Just at the moment
banks and landed estate are the cor-
rect thing.

The Montevideo Lottery man-
agers, whoever they are, are doing
their best to knock it on the head,
and nobody will be very much more
the worse if they succeed. The Aurora
asserts that, in the drawing on the
7th inst., over 200 numbers that "on
no prize were substituted in the
Extract for others that won. A
nice affair, but not the first of the
kind in lottery gambling.

The Reforma of Mercedes an-
nounces that a pedagogue named
Aguila has soared away from that
quarter, bag and baggage (furniture
and family) and no trace of himself.
Mrs. or little Baglets can be found
by even the most assiduous and in-
terested enquirers.

We are sorry to hear that there is
a deal of cattle and sheep stealing
and other outrage going on in the
rich Partido of Giles. Mr. Dantas
has evidently not licked his Camp
Police into any very useful shape, or
such doings could hardly go on in a
thickly populated partido like Giles.

We regret to have had to publish
in our issue of yesterday the cutting
of the fence on Messrs Duggan's
estancia in Chacabuco, and taking
cattle wholesale from same. What
opinion is the public to form of the
security for property in the camp,
when such robberies are of every
day occurrence? Estancieros are taxed
to the utmost and our authorities
vie with those of any country in the
world for their activity in collecting
those taxes; but the protection af-
forded in return is nil. The partido
of Chacabuco has always enjoyed a
bad name for being the refuge of
'cuatros' of the worst type, and
the neighbours lay the blame of this
on the local authorities. The land
of the ejido of Chacabuco (we are
informed) is occupied almost—by
a class who have no legitimate means
of living, when the same lands could
be sold to parties who would pay
for the land and work for their liv-
ing, which would be an improvement

in every sense. We hope our present
Governor will look to this matter,
and take our hints, which are well
founded; and also if the local au-
thorities do not comply with their
obligation, to have them replaced by
men of better energy and more con-
fidence, men who will scatter the
'cuatros' who make Chacabuco
their abode.

Five thousand pairs worth of tick-
ets were sold in Rosario alone for the
Santa Fe Lottery drawn yester-
day. Although we refuse to place
lottery gambling amongst the seven
deadly sins, we are free to admit
that there is far too much of it going
on now in the Plate.

A Mercedes colleague says that
the new graverider there is giv-
ing such universal satisfaction to
his patrons (dead or alive!) that
Hamlet would be delighted with
him, could he 'revisit the glumpes of
the moon' and make his acquain-
tance.

The Reason of Tucuman (the best
paper in the Interior, by the way)
reports a great scarcity of labour
on the sugar plantations there,
owing to all the best 'paisanos'
being taken up for the Andine Rail-
way extension, on which there are
now 2300 navies engaged. The lat-
est reports announce 21 kilometres
of the line as complete, rails and all.
The immigration Commissioners in
Tucuman are powerless to get up
any fresh hands from Buenos Aires,
as they have not a copper real in
their till, nor the slightest prospect
of one.

An influential camp colleague
asks the following question, which
we leave to our banking subscribers
to answer:—"Is the manager of a
branch bank in the camp strictly
within the bounds of duty when he
discounts the bill of an insolvent in
the city, with the endorsement of
the post-boy of a camp pulperia, the
latter being a near relative of the
insolvent? For ourselves, we hard-
ly think that Deputy Degreif, in
his proposed Bill, would consider
such customers as coming under the
head of 'persons of recognised re-
spectability,' although it is sometimes
most awfully hard to tell who is
'respectable' and who is not. Many
liberal thinkers consider that every
man who carries an umbrella (espe-
cially if it be a silk one) is entitled to
be called respectable, or, in case of
necessity, 'highly respectable.'

The Industrial says that the next
tax crop will be worth two million
pias.

The map of the second Section
of the Rio Negro Lands is finished
and approved by Government, and
the titles will now be made out and
delivered.

The news about the Cholera in
Uruguayana is all faddisick. A
little typhoid fever, nothing more.

Yesterday was the anniversary of
Paraguayana Independence.

The National Executive sent a
message to Congress yesterday, to
be opened at a secret sitting.

One of the National Guards en-
rolled in Rosario lately is described
in his 'papeleta' as 'lame in the
left eye.'

A curious public meeting was
held on the Paseo de Julio on Fri-
day—of washerwomen—to protest
against some order of the Port
Captain, which obliges
